# 聯合國簡介

- 聯合國 ( United Nations )
- 成立於1945年
- 目前有193個成員
- 使命：維護國際和平、發展國家間友好關係、促進社會經濟發展、和保障人權民主自由。

## 任務：

維護國際和平

保護人權

人道救援(邊境難民)

推廣永續發展

支援國際法

處理跨國事務 ( 如跨國犯罪、國際糾紛、跨境貿易等 )

# UN iLibrary聯合國出版品知識庫?

- 此知識庫專收聯合國所發行之各項出版品
- 主要由50多個聯合國所屬辦事處、基金會與計畫單位所撰寫
- 聯合國官方的六種語言出版：英文、法文、中文、俄文、西班牙文和阿拉伯文
- 為全球圖書館員、專家、學者、政策制定者、公眾影響者和一般大眾，提供了一個全球動態議題之智庫平臺，包括：政策分析、趨勢預測和合作發展建議等。

【知識庫網址】 <https://www.un-ilibrary.org>

# Covering a wide range of issues

Other results include "UN COVID-19 and Conflict" (September 2020) and "UN COVID-19 in Africa" (October 2020).

Document page for "Recovering from COVID-19: the importance of investing in global public goods for health". The page is part of the "DECADE OF ACTION" series, Policy Brief #83. It features the United Nations logo and the Department of Economic and Social Affairs.

**Summary**  
 The COVID-19 pandemic has exposed inadequacies in health systems worldwide. As countries plan for recovery, attention should be paid not only to the strengthening of health systems at the national level, but also at the global level through investing in global public goods for health. International solidarity and multilateral support are needed to forge a stronger global health system. They are a vital part of the crisis recovery process to build a future resilient against epidemics, pandemics and other health challenges in a globalized world.

**GLOBAL PUBLIC GOODS IN HEALTH Terminology**  
 Public goods—such as street lighting, regulations and national defence—meet salient needs of society and play a crucial role in making it more secure.<sup>1</sup> However, people can benefit from public goods without paying for them (a “free rider” problem), leading to a lack of incentives to produce them by profit-seeking private providers. Viewed from a different angle, public goods have significant positive “spill-over effects” valuable to a community—above and beyond benefits to individual consumers—that are not reflected by their market value. As a result, public goods have typically been underproduced by the market, with Governments taking up responsibility for their provision domestically.

Beyond the national context, public goods are also essential at the global level. The international transmission of the coronavirus and the transnational impacts of national responses to COVID-19 underscore the need for international cooperation and coordination. While definitions vary as to what exactly constitute global public goods for health, they can generally be viewed as cross-border functions or interventions that contribute to health progress, and that are not adequately produced by market forces.<sup>2</sup> Examples include disease surveillance and control, research on the causes and treatment of diseases, research for a vaccine, information sharing, outbreak preparedness and standards and guidelines.

**Global health functions are vital but underproduced and underfunded**  
 In a highly interconnected, interdependent world, health risks and diseases can take on a cross-border nature and result in significant health, social and economic impacts beyond any one single country or region. National health capacities and measures alone can be insufficient—as evidenced in the current pandemic as well as past health emergencies. In this context, global health functions or interventions address important needs that cross national

1. In economics, public goods are those for which access cannot be denied to any individual (non-excludable), and where usage by one individual does not reduce availability for others (non-rivalrous).  
 2. One such reference is the World Health Organization's Common Goods for Health Framework. See: <https://www.who.int/health-topics/common-goods-for-health>.

## Asia-Pacific Sustainable Development Journal

About Current issue Previous issues

The Asia-Pacific Sustainable Development Journal (APSDJ) aims to stimulate debate and enrich research in the formulation of policy in the Asia-Pacific region towards the fulfilment of the 2030 Agenda for Sustainable Development. The APSDJ seeks to provide a forum for the exchange of knowledge, experiences, ideas and analysis on issues concerning sustainable development across its economic, social and environmental dimensions. Published twice a year, the APSDJ is a rebranded journal of ESCAP that builds on the success of two earlier journals - the Asia-Pacific Development Journal (APDJ), being published since 1994, and the Asia-Pacific Population Journal (APPJ), in print since 1986. These journals are being merged in recognition of the interconnected and multidisciplinary nature of sustainable development.

COVID-19 Reports  
Learn More

The United Nations provides new information on COVID-19 as it becomes available, and we are sharing the latest reports and policy briefs here on UN iLibrary.

Asia-Pacific Sustainable Development Journal Vol. 28, No. 2, December 2021 Can Asia-Pacific central banks and financial supervisory authorities do more? Securing green development: Can Asia-Pacific central banks and financial supervisory authorities do more?

2018 (State Bank of Viet Nam) lending to priority green and practices among the... ensure that by 2025 all banks have internal frameworks to manage environmental and social risks for their lending activities.\* On its part, the Bank set out incentives and preferential mechanisms to support green lending activities and promote capacity-building on green banking. Partly driven by these policy changes, the balance of green loans in Viet Nam reached \$3.8 billion by mid-2019, up by 32 per cent from 2018 (Huong, 2021).

**Management of central bank's portfolio (1): responsible portfolio investment in Hong Kong, China.** In May 2019, the Hong Kong Monetary Authority introduced several key measures on sustainable banking and finance, including the establishment of a centre for green finance. One important measure was to adopt responsible investment principles for its Exchange Fund under which priority is given to ESG investment if the long-term return is comparable to other investments on a risk-adjusted basis (Hong Kong Monetary Authority, 2019). To support this, the Authority incorporated ESG factors into its credit risk analysis, required external managers to comply with the principles of responsible ownership promulgated by the Hong Kong Securities and Futures Commission, and planned to expand its green bond portfolio and participate in ESG-themed public equities investments. For private market investments, the Authority has invested in renewables since 2013 and included green accreditation as a predominant factor for real estate investments (Hong Kong Monetary Authority, 2021).

**Management of central bank's portfolio (2): increasing central bank's investments into ESG assets in the Republic of Korea.** As part of an effort to conduct sustainability-oriented central banking practices, the Bank of Korea has gradually expanded its investments in ESG assets. At end-2020, investment in ESG equities and fixed-income securities, including through the external fund management programme, was at \$5.46 billion or approximately 1.2 per cent of the foreign exchange reserve value (table 6). The Bank of Korea aims to increase its ESG investment further to strengthen the public accountability of official reserve management and enhance the overall investment performance (Bank of Korea, 2021).

Fund managers	Financial instruments	Market value (\$ billion)	Share of foreign exchange reserves (per cent)
Internal	Bonds	3.49	0.8
External	Bonds	0.89	0.2
	Equities	1.08	0.2
<b>Total</b>		<b>5.46</b>	<b>1.2</b>

Source: Bank of Korea (2021).

**Supporting sustainable finance (1): supporting sustainable financial market development in Singapore.** One of the goals of the Monetary Authority of Singapore is to support the financial sector in mitigating climate risks and promoting green projects to foster a diverse ecosystem of green financing capabilities and promote green development in Asia and the Pacific. To this end, the Authority set up the \$2 billion Green Investment Programme in 2019 to invest in sustainability-oriented public market investment strategies (Monetary Authority of Singapore, 2019). The first investment under the Programme is a \$100 million placement with the BIS Green Bond Investment Pool. As of June 2021, \$1.8 billion has been allocated to five asset managers who are tasked with establishing their sustainability hubs in Singapore and launching new ESG-themed funds for the Asia-Pacific region (Menon, 2021). The Authority also expects these managers to exercise their shareholder rights to influence their investee companies to address climate risks and move towards more sustainable practices.

**Supporting sustainable finance (2): coordinating financial sector initiatives in Thailand.** In August 2021, the Working Group on Sustainable Finance, consisting of the Bank of Thailand, the Fiscal Policy Office, the Securities and Exchange Commission, the Office of Insurance Commission and the Stock Exchange of Thailand, jointly published an initiative on sustainable finance that sets the direction and framework for sustainable finance for the financial sector (Working Group on Sustainable Finance, 2021). The initiative has five key strategic objectives: (a) developing a practical economy, which serves as a common definition and classification system of economic activities; (b) improving data environment and quality for disclosure and transparency; (c) implementing effective incentives for fundraisers and investors; (d) creating demand-led sustainable financial products and services; and (e) building human capital to accelerate the sustainability transformation of the financial sector. On its part, the Bank of Thailand has incorporated sustainability into its strategic plan and organizational culture (Bank of Thailand, 2019a). Moreover, it is working with the

**Abstract**

This dataset contains data on the global Sustainable Development Goal indicators and includes global and regional aggregates as well as country-level data for 115 of the 230 Sustainable Development Goal indicators (for its 2016 edition), with almost 500 data series and more than 330,000 data records. The data series comprise Sustainable Development Goal indicators series and additional data series under many of the indicators. Many of the data series contain disaggregated data.

## The Sustainable Development Goals Report 2022

### The Sustainable Development Goals Report 2022

7 July 2022: *The Sustainable Development Goals Report 2022* provides a global overview of progress on the implementation of the 2030 Agenda for Sustainable Development, using the latest available data and estimates. It tracks the global and regional progress towards the 17 Goals with in-depth analyses of selected indicators for each Goal.

According to the Report, cascading and interlinked crises are putting the 2030 Agenda for Sustainable Development in grave danger, along with humanity's very own survival. The Report highlights the severity and magnitude of the challenges before us. The confluence of crises, dominated by COVID-19, climate change, and conflicts, are creating spin-off impacts on food and nutrition, health, education, the environment, and peace and security, and affecting all the Sustainable Development Goals (SDGs). The Report details the reversal of years of progress in eradicating poverty and hunger, improving health and education, providing basic services, and much more. It also points out areas that need urgent action in order to rescue the SDGs and deliver meaningful progress for people and the planet by 2030.

 (additional languages forthcoming)

**“We must rise higher to rescue the Sustainable Development Goals – and stay true to our promise of a world of peace, dignity and prosperity on a healthy planet.”**

António Guterres  
 Secretary-General, United Nations

#### About this Report

*The Sustainable Development Goals Report 2022* is the only UN official report that monitors global progress on the 2030 Agenda for Sustainable Development. Using the latest available data and estimates, *The SDGs Report 2022* gives the global community a reality check on the devastating impacts of multiple crises affecting people's lives and livelihoods. This annual SDG Report is prepared by UN DESA, in collaboration with the entire UN Statistical System, consisting of more than 50 international and regional agencies, based on data from over 200 countries and territories.

# 《2022 永續發展目標報告》

## 可持续发展目标报告 2022

- 是唯一一份監測全球 “2030 年永續發展目標” 進程的官方報告。
- 這份年度報告是由聯合國經濟社會社部與聯合國統計處合作編寫，分析來自 200 多個國家和地區的數據。
- 使用最新可靠的數據，來檢視會影響全球人民生活和生活計上的多項危機。

# ENVIRONMENT

## 13 采取紧急行动 应对气候变化及其影响

**气候变化**  
是对人类的“红色警戒”

我们避免气候灾难发生的一线机会正在迅速失去

2021年  
与能源有关的  
二氧化碳排放量  
增加6%  
达到历史  
最高水平

气候融资  
没有达到  
\$1000亿  
的年承诺额

发达国家在2019年  
提供了\$796亿  
气候融资

全球气温上升  
趋势未得到扭转, 造成  
极端天气增多

## 14 保护和可持续利用海洋和海洋资源 以促进可持续发展

**我们的海洋**  
地球上最大的生态系统  
正面临威胁

塑料污染  
正在严重危害海洋

2021年  
超过1700万公吨  
的塑料进入海洋

预计到2040年将  
增加一倍或两倍

日益严重的酸化  
正在威胁着海洋生物  
并限制海洋  
调节气候变化的能力

海洋吸收全球每年的  
1/4的二氧化碳排放量

世界上90%  
的渔民从事  
小型渔业

受疫情影响  
需要加快实施  
对他们的支持措施

## 15 保护、恢复和促进可持续利用陆地生态系统, 可持续管理森林, 防治荒漠化, 制止和扭转土地退化, 遏制生物多样性的丧失

每年1,000万  
公顷的森林 受到毁坏

全球近90%的森林砍伐  
是农业扩张造成的

133个缔约方已批准  
《名古屋议定书》  
该议定书涉及  
遗传资源  
的获取及公平公正的使用

生物多样性  
在新冠疫情的恢复性支出中  
基本上被忽视

根据记录, 约  
4万个物种  
在未来几十  
年内将  
面临灭  
绝风险

近一半的淡水、陆地和山地  
生物多样性重要区域  
受到保护

# ECONOMICS

**8 促进持久、包容和可持续的经济增长，促进充分的生产性就业和人人获得体面工作**

## 全球经济复苏受以下因素阻碍

## 全球经济复苏因乌克兰危机而进一步受挫

## 全球失业率

至少在**2023年前**，将保持在疫情前的水平以上

全世界**十分之一**的儿童充当童工

劳动生产率有所上升，但最不发达国家除外

**9 建造具备抵御灾害能力的基础设施，促进具有包容性的可持续工业化，推动创新**

## 全球制造业

已从新冠肺炎疫情中有所恢复，但最不发达国家却落在后面

## 高科技产业

相比低科技产业而言，危机中的韧性高得多

## 小型产业

无法获得恢复所需的财政支持

## 客运航空业

仍在努力挽回灾难性的损失

## 三分之一的制造业岗位

受到危机的**负面**影响

**12 采用可持续的消费和生产模式**

## 不可持续的

消费和生产模式从根本上造成了

## 我们越来越依赖

自然资源

从2000到2019年，全球范围内这种依赖上升超过

65%

## 各国每天都在损失或浪费大量粮食

## 世界上绝大多数

电子废弃物没有得到安全处理

## 17% 的粮食在消费过程中被浪费

魚與熊掌兼得的綠色經濟？

看看奧地利gugler\*訴說紙的故事：我們以為回收紙已經算是最環保的作為了，但最了解紙的印刷廠告訴你回收背後的故事，以及他們如何思考讓紙張從搖籃到搖籃，而不是走進墳墓。

又能讓我們正確使用資源而非僅僅減少破壞

# 生產效益→事後補救

# 魚與熊掌兼得的綠色經濟？！

## 從搖籃到搖籃的思維

商業只是環保行動的媒介by 美國Patagonia公司總裁Yvon Chouinard  
成為對地球有幫助的企業

# 聯合國《2022 永續發展目標報告》

**“We must rise higher to rescue the Sustainable Development Goals – and stay true to our promise of a world of peace, dignity and prosperity on a healthy planet.”**

*António Guterres Secretary-General,  
United Nations*

我們必須站得更高，才能努力實踐SDG目標—並堅守承諾，在健康的地球上，建立一個人人享有和平、尊嚴和繁榮的世界。

— 丹東尼奧·古特雷斯

用從搖籃到搖籃的思維  
→ 讓環境永續成為事業  
就已經是綠色經濟的實踐了
