

AI in Micromedex: Streamlining your searches so you can focus on clinical decisions

The evolution of Micromedex® with artificial intelligence (AI) unlocks even faster access to answers from the expertly curated drug content you trust, so you can focus on making the best decision for your patients.

1. Built to accelerate clinical workflows

- **Purpose-built for clinicians:** Designed to empower clinicians by delivering meaningful enhancements to their daily work
- **Faster, tailored responses:** Reduces search time during patient care by unlocking concise summaries for quick, specific answers while still supporting efficient access to in-depth information
- **Streamlined decision making:**
Enhances workflow efficiency by reducing search time, allowing clinicians to focus on informed decision-making

2. Trusted content at its core

- **Uncompromised accuracy:** AI powered answers are sourced from Micromedex's expertly curated, clinically validated drug database to reliably support informed decisions
- **Upfront transparency and traceability:** Easily track data sources with full citations and hyperlinks, providing supporting evidence and streamlining fact-checking for added confidence
- **Unmatched precision and depth:** Purpose-built for evidence-based, drug-specific information to deliver accurate, relevant responses, empowering better data-driven decisions

3. Validated in collaboration with experts

- **Clinician-approved insights:** AI output has been validated for patient safety and clinical relevance, preserving the integrity of the drug data
- **Data scientist:** Multidisciplinary expertise ensures accuracy, reliability, and integrity in AI-powered responses
- **Outcomes focused implementation:** Purposefully designed with active customer collaboration to address key challenges like data overload, time constraints, and workflow efficiency, prioritizing user trust and safety
